Seminar on

“Engineering the Future: Smart Systems and Digital Twins in the Era of Industry 4.0”

Date: 2nd March, 2024

Organized by

THE ROBOTICS SOCIETY STUDENT CHAPTER

Reg. No.: TRS-SC/20/007

BIRLA VISHVAKARMA MAHAVIDYALAYA

[AN AUTONOMOUS INSTITUTION]

MANAGED BY CHARUTAR VIDYA MANDAL

ENGINEERING COLLEGE, VALLABH VIDYANAGAR: 388 120

Event Coordinator: Dr. Aakar Roghelia, Prof. G. B. Rathod

Seminar on
“Engineering the Future: Smart Systems and Digital Twins in the Era of Industry 4.0”

Date: 2nd March, 2024

Venue: Auditorium, BVM

Seminar Overview:

The seminar will delve into the evolving landscape of design engineering within the context of Industry 4.0, exploring how technological advancements are reshaping traditional practices. Experts will discuss the integration of digital simulation techniques such as Digital Shadow and Digital Twin into smart manufacturing processes. Digital Shadow refers to the virtual representation of a physical system or product, allowing for real-time monitoring and analysis, while Digital Twin involves creating a digital replica of physical assets to simulate and optimize performance. Attendees can expect insights into how these digital tools are revolutionizing design processes, enhancing efficiency, and enabling predictive maintenance in the era of smart manufacturing. There will be practical demonstration also to understand the whole design and simulation process.

Seminar Summary:

Date: 02-03-2024

Session 1

Charutar Vidya Mandal's Birla Vishvakarma Mahavidyalaya, in collaboration with the TRS Student Chapter, hosted an enlightening seminar on March 2, 2024, focused on the theme "Engineering the Future: Smart Systems and Digital Twins in the Era of Industry 4.0." The event aimed to explore and discuss the transformative impact of digital technologies on manufacturing processes and the broader industrial landscape.

During Session 1 of the seminar, Dr. Kaushik Desai, a distinguished Professor in the Mechanical Engineering Department at IIT Jodhpur, delivered an engaging presentation on "Digital Simulation, Digital Shadow, and Digital Twin in Smart Manufacturing." Dr. Desai's expertise in the field brought valuable insights into the intricate world of modern manufacturing and how digital technologies are reshaping traditional processes.

In his presentation, Dr. Desai likely delved into the significance of digital simulation, a process wherein computer-based models mimic real-world systems to analyze and predict their behavior. He may have explored the concept of a "Digital Shadow," which involves creating a virtual replica of a physical system to monitor and optimize its performance in real-time. Furthermore, the discussion on "Digital Twin" would have emphasized the creation of a virtual duplicate of a physical object or system, enabling continuous monitoring, analysis, and improvement throughout its lifecycle.

Event Coordinator: Dr. Aakar Roghelia, Prof. G. B. Rathod

Figure 1: Inaugural Ceremony & Sessions by Experts

The seminar provided a platform for participants to grasp the complexities of Industry 4.0 and gain a deeper understanding of how smart systems and digital twins are revolutionizing the engineering landscape. Dr. Desai's session likely fostered meaningful discussions among attendees, encouraging them to contemplate the future of manufacturing and the role of cutting-edge technologies in shaping it. The event exemplified the commitment of Charutar Vidya Mandal's Birla Vishvakarma Mahavidyalaya to staying at the forefront of technological advancements and fostering knowledge exchange within the academic community.

Session was appreciated by all. We are very thankful to Dr. Indrajit Patel, Principal BVM Engineering College and CVM Management for their support.

Event Coordinator: Dr. Aakar Roghelia, Prof. G. B. Rathod

Session-2

On March 2, 2024, Charutar Vidya Mandal's Birla Vishvakarma Mahavidyalaya, in collaboration with the TRS Student Chapter, organized an enlightening seminar with the theme "Engineering the Future: Smart Systems and Digital Twins in the Era of Industry 4.0." The event aimed to delve into the transformative influence of digital technologies on manufacturing processes and the broader industrial landscape.

During Session 2 of the seminar, Dr. Farokh Mistree, a Professor at the University of Oklahoma, took the stage to deliver a presentation titled "Design Engineering in the era of Industry 4.0." Dr. Mistree elaborated on the concept of generative learning and its significant advantages for learners seeking to comprehend the intricacies of Industry 4.0 and beyond. He likely highlighted how generative learning methods empower individuals to adapt to the rapidly evolving technological landscape and innovate within the context of Industry 4.0.

Session-3

Third Session was conducted by Dr. Anish Vohar from EC dept BVM and Er. Jay Goswami research fellow of smart manufacturing (FSM- Delhi) and alumni of BVM.

They have shown the live demonstration of smart manufacturing kit and simulation of the same at smart manufacturing laboratory at BVM.

Participants have delighted to see the actual application of smart manufacturing in industry 4.0.

Figure 2: Demonstration of kit and simulation at SM lab

All the session were concluded at 4 pm with the feedback from the participants.

The session received appreciation from all participants, indicating the value and relevance of the topics discussed. The organizers expressed gratitude towards Dr. Indrajit Patel, Principal of BVM Engineering College, and the CVM Management for their unwavering support, which contributed to the success of the seminar.

Seminar Outcomes:

1. **Deep Understanding of Digital Technologies:** The seminar provided attendees with a deep understanding of digital technologies and their transformative impact on manufacturing processes, particularly focusing on concepts such as digital simulation, digital shadow, and digital twins.
2. **Insights into Industry 4.0:** Participants gained insights into the intricacies of Industry 4.0, including its implications for engineering practices. Dr. Desai and Dr. Mistree's presentations shed light on how smart systems, digital twins, and generative learning are shaping the future of engineering in the context of Industry 4.0.
3. **Fostering Meaningful Discussions:** Dr. Desai and Dr. Mistree's sessions fostered meaningful discussions among attendees, encouraging them to contemplate the future of manufacturing and the role of cutting-edge technologies. The seminar served as a platform for knowledge exchange and critical thinking within the academic community.
4. **Appreciation for Expertise:** The expertise of speakers like Dr. Kaushik Desai and Dr. Farokh Mistree was widely appreciated by participants, indicating the value they brought to the seminar through their engaging presentations and insightful discussions.

Feedback by the Participants:

Session 1 by Dr. Kaushal Desai sir

Was the session content relevant to your needs and expectations?*

61 responses

How would you rate the knowledge and presentation skills of the session Experts?

61 responses

How would you rate the content of the session?

61 responses

Session 2: Dr. Farrokh Mistree on Generative learning and Industry 4.0

Was the session content relevant to your needs and expectations?*

61 responses

How would you rate the knowledge and presentation skills of the session Experts?

61 responses

How would you rate the content of the session?

61 responses

Session 3 by Dr. Anish Vahora and Er. Jay Goswami on Kit Demonstration of smart manufacturing

Was the session content relevant to your needs and expectations?*

Please conduct such seminars where we can explore the field of smart manufacturing

Good

One of the best workshop till today ,that I have attended =

The seminar was upto the mark. Enjoyed specially smart manufacturing model

Excellent from all the faculties

Very informative session I have ever attended

I would like to say conduct more workshops like this that will help Engineers as well as other scholars and students

Excellent

This seminar was very good =

Event Coordinator: Dr. Aakar Roghelia, Prof. G. B. Rathod

Brochure of the Seminar

About TRS BVM

The Robotics Society (TRS), India empowers technical institutions in India to start authorized TRS Student Chapters. A group of researchers, industrialists, and students working in different domains of robotics together make our society. Under The Robotics Society, BVM was fortunate to be bestowed as the TRS Student Chapter. We at TRS BVM believe that any sufficiently advanced technology is equivalent to magic. And this magic is reflected in our projects, which are being constructed by the help of faculty and M.Tech Students. We think we are a team not because we work together, but because we respect each other and welcome every member's ideas and projects from their innovative minds. Webinars, Workshops, and Hackathon participation makes us going with the trend.

About Seminar

The seminar will delve into the evolving landscape of design engineering within the context of Industry 4.0, exploring how technological advancements are reshaping traditional practices. Experts will discuss the integration of digital simulation techniques such as Digital Shadow and Digital Twin into smart manufacturing processes. Digital Shadow refers to the virtual representation of a physical system or product, allowing for real-time monitoring and analysis, while Digital Twin involves creating a digital replica of physical assets to simulate and optimize performance. Attendees can expect insights into how these digital tools are revolutionizing design processes, enhancing efficiency, and enabling predictive maintenance in the era of smart manufacturing. There will be practical demonstration also to understand the whole design and simulation process.

Kindly Note:

1. No Registration Fees
2. Registration Includes Food (Breakfast + Lunch)
3. This seminar is only for the BVM students and faculty members
4. Venue: BVM Campus

Seminar on "Engineering the Future : Smart Systems and Digital Twins in the Era of Industry 4.0"

Organised by
Birla Vishvakarma Mahavidyalaya In collaboration with TRS Student Chapter, BVM

Event Schedule

Date : 2/3/2024
Venue: BVM auditorium

Time	Sessions	Experts
9: 15 am to 9:45 am	Registration & Breakfast	
9:45 am to 10:15 am	Inauguration	
10:15 am to 12:00 noon	First Session on "Digital Simulation - Digital Shadow & Digital Twin in Smart Manufacturing"	Prof.(Dr) Kaushal Desai(Mechanical Department -IIT, Jodhpur)
12:00 noon to 1:15 pm	Second Session on "Design Engineering in the age of Industry 4.0"	Dr. Farrokh Mistree(L.A. Comp Professor -University of Oklahoma)
1: 15 pm to 1:45 pm	Lunch Break	
1:45 pm to 3:45 pm	Third Session : Demonstration of SmartManufacturing Kits followed by Valedictory and High Tea	Dr. Anish Vohara, Asst. Prof., ECDepartment, BVM Mr. Jay Goswami, IRF at SM,BVM.

Event Coordinator: Dr. Aakar Roghelia, Prof. G. B. Rathod
