

A Report On
THE ANNUAL GENERAL BODY MEETING, 2023
In association with
THE ROBOTICS SOCIETY STUDENT CHAPTER
14-10-2023 & 06-01-2024

B.V.M. Engineering College [An Autonomous Institution]
Managed By Charutar Vidya Mandal

TRS BVM Student Chapter organized

“Workshop on ROBOT OPERATING SYSTEM”

Date: 14-10-2023 & 06-01-2024

Time: 10:00 am to 04:00 pm

Venue: TRS LAB

Workshop Overview:

The ROS workshop commenced with an inspiring address by the teaching faculty and TRS chapter guide setting the tone for the event. Faculty Advisors and Mentors made their presence in the workshop. Dr. Dipak M. Patel and Vijaypratab Singh sir were the coordinators of this workshop. After Dr. Vinay Patel, HOD of Mechanical Department, gave a brief on this workshop, he appreciated the participants and the volunteers.

Over 15+ students of TRS BVM and non TRS members were inspired and joined this workshop to learn and grow. The workshop was open for all the student irrespective of their branch or the year of study.

Workshop Objectives:

The primary objectives of the workshop were as follows:

1. Introduction to Ubuntu installation :-

- Understand the importance of a Linux-based operating system for ROS.
- Learn the steps to install Ubuntu on a computer or virtual machine.

2. System Requirements:-

- Understand the hardware and software requirements for running Ubuntu and ROS.

3. Basic Linux Commands:

- Familiarize participants with essential Linux commands needed for system navigation and management.

4. ROS Installation:

- Learn how to set up the ROS environment on Ubuntu.
- Understand the installation process for different ROS distributions (e.g., ROS Kinetic, Melodic, etc.).
- Create and configure a ROS workspace to organize and manage ROS packages.

5. Simulator Installation :-

- Introduce participants to robot simulators compatible with ROS, such as Gazebo.
- Optionally, guide participants through the installation of a robot simulator for practice.

Workshop Outcomes:

1. Basic Ubuntu Proficiency.
2. ROS Environment Setup.
3. Understanding ROS Concepts.
4. Hands-On Coding Skills.
5. ROS Tool Proficiency.
6. Simulator Interaction .
7. Troubleshooting Skills.
8. Best Practices.

Summary:

The completion of the ROS (Robot Operating System) workshop marks a significant milestone. The workshop provided a thorough understanding of ROS, spanning fundamental concepts to advanced applications. Through hands-on experiences and collaborative learning, participants gained practical insights. The acquired knowledge is poised to elevate robotics skills, with an eagerness to integrate ROS in future projects.

Workshop Glimpses:
