**Webinar Report: Embracing the Future of Manufacturing, Engineering,
and Technology**

Date & Time:

 12th March 2025 |  3:00 – 4:00 PM

About the Webinar

The TRS Student Chapter of BVM Engineering College, under the esteemed guidance of Charutar Vidya Mandal, successfully conducted a webinar on “Embracing the Future of Manufacturing, Engineering, and Technology” on 12th March 2025. The session featured Ms. Purnima Prakash, Senior Manager - Academic Partnerships at NAMTECH University, who provided valuable insights into Industry 4.0, sustainability in manufacturing, and essential industry skills for future professionals.

The event attracted more than 50 students from various disciplines, including Mechanical, Electronics, Computer Science, and Civil Engineering, reflecting the growing interest in interdisciplinary opportunities in MET (Manufacturing, Engineering, and Technology). The session was coordinated by Dr. Mehfuza Holia from the Electronics Department and Prof. Jayesh Koisha from the Mechanical Department. The interactive format of the webinar allowed students to engage with the speaker, gain industry-relevant knowledge, and explore career opportunities in emerging fields.

About Speaker:

Ms. Purnima Prakash is a seasoned marketing professional with over a decade of experience across industries such as print media, education, and healthcare. She has worked with Hindustan Times, India Today Group, and The Tribune, leading initiatives in the Tribune in Education segment. She has also contributed to institutional marketing at BML Munjal

University, Delhi, and currently plays a key role in academic partnerships at NAMTECH University. With expertise in marketing trends, consumer behavior, and industry needs, she brought a unique perspective to the discussion.

Objective

The primary objectives of this webinar were to:

- Educate students about Industry 4.0 and its impact on Manufacturing and Engineering.
- Highlight sustainability challenges and innovations in MET.
- Discuss the essential skills required for students to thrive in a rapidly evolving industry.
- Break common myths about the manufacturing sector and its interdisciplinary opportunities.

Key Topics Covered :

- ◆ Sustainability in Manufacturing, Engineering & Technology (MET)
- ◆ Industry 4.0 – The Future of Manufacturing & Engineering
- ◆ Essential Skills for Students in Industry 4.0
- ◆ Breaking Myths About the Manufacturing Industry
- ◆ Leveraging Opportunities Across Disciplines in MET

Outcome & Key Takeaways

- Students gained an in-depth understanding of sustainability in MET and its importance in shaping future industries.
- The session provided practical insights into Industry 4.0, automation, digital transformation, and smart manufacturing.
- Students learned about the technical and managerial skills necessary to excel in the evolving job market.
- The event encouraged interdisciplinary collaboration by highlighting how Computer Science, Electronics, and other branches can contribute to MET advancements.
- The interactive session helped clear misconceptions about the manufacturing industry, inspiring students to explore diverse career opportunities.

Acknowledgments:

The TRS Student Chapter extends its heartfelt gratitude to Prof. (Dr.) Vinay J. Patel, Head, Mechanical Engineering Department, and Advisor, TRS Student Chapter, BVM, for his guidance and support in organizing this insightful webinar. Sincere appreciation is extended to Principal BVM, Prof. (Dr.) I. N. Patel, and CVM Chairman, Er. Bhikhubhai Patel, for their continuous encouragement and institutional support.

Special thanks to the Heads of Departments for their valuable guidance in making this event a success. The chapter also extends its gratitude to Dr. Devang Joshi, Registrar, and Prof. Umang Desai, for their support and coordination in facilitating this webinar.

A heartfelt appreciation goes to Ms. Purnima Prakash from NAMTECH University for sharing her expertise and inspiring students with her industry knowledge. Lastly, we thank all the faculty members and students who participated and contributed to the success of this event.

Glimpses:

This screenshot shows the same Zoom webinar interface, but with a presentation slide displayed. The slide is titled "MET: Key to Transforming India" and contains the following information:

- Core of MET : Innovation | Sustainability and Digital technologies**
- 170 million** new roles will emerge in MET by **2030 globally**. (World Economic Forum)
- According to the All India Manufacturing Report (2023)**, women's representation in core (MET) roles has grown from 12% in 2018 to 17% in 2023
- India's semiconductor industry is projected to create **1 million jobs by 2026** (Economic Times)
- 75% of manufacturers** are investing in AI, Robotics, and Smart Factories. (World Economic Forum, 2023)
- Manufacturing (16% of GDP) is set to **reach 30% by 2047**. (World Bank, 2023)
- Sustainability in MET expected to generate 24 million** new green jobs globally by 2030. (Wikipedia)
- Growth in manufacturing does not mean more jobs - Myth**

The slide also features a section titled "MET Focus Areas" with the following sub-points:

- Smart Manufacturing & Industry 4.0** - Automation, Internet of Things, Artificial Intelligence-driven production
- Robotics & Automation** - Industrial robots, intelligent automation systems
- Semiconductors & Electronics** - Chip design, embedded systems, electronic manufacturing services
- Sustainable & Green Technology** - Renewable energy, recycling, environmental sustainability
- Aerospace & Defense** - Aircraft manufacturing, defense electronics
- Automotive & Electric Vehicles** - Electric vehicle production, battery technology, self-driving cars
- Metallurgy & Material Science** - Advanced alloys, nanotechnology-based materials

The Zoom interface shows 45 people in the top toolbar and a grid of 16 participant tiles on the right. The status bar at the bottom shows the weather as 100°F Sunny, a search bar, and system icons for time (3:27 PM) and date (3/12/2025).
