

Birla Vishvakarma Mahavidyalaya Engineering College

The Robotics Society, India Student chapter

Report on
Expert Talk on "NEW ROBOTICS
SCENARIO"

DATE AND DAY:- 17th September, 2025,
WEDNESDAY

75th A NAAC

NEW ROBOTICS SCENARIO
EXPLORING THE FRONTIERS OF SOFT ROBOTICS AND ADVANCED APPLICATIONS

FACILITATOR:
PROF. MOHSIN I. HASAN
ASST. PROF. CP DEPT.

DEVELOP AND LEARN ABOUT SOFT ROBOTICS COVERING BASIC PRINCIPLES, DESIGN APPROACHES, AND THE LATEST DEVELOPMENTS IN ADAPTABLE ROBOTIC SYSTEMS.

17th SEPT 2025 **3:00 P.M. ONWARDS** **C 206**

trs_bvm **TRS BVM Student Chapter** **TRS BVM Student Chapter**

The TRS Student Chapter of Birla Vishvakarma Mahavidyalaya (BVM), under the auspices of Charutar Vidya Mandal (CVM), successfully organized an enlightening expert session on “New Robotics Scenario: Exploring the Frontiers of Soft Robotics and Advanced Applications” on 17th September 2025 at BVM, Vallabh Vidyanagar.

The session was delivered by Prof. Mohsin I. Hasan, Assistant Professor in the Computer Engineering Department, who shared his expertise in Artificial Intelligence (AI) and Machine Learning (ML) and connected these domains with the latest trends in robotics. His talk emphasized how soft robotics is transforming the robotics landscape by introducing adaptability, flexibility, and human-friendly interactions.

Prof. Hasan guided participants through the fundamental principles of soft robotics, design approaches inspired by nature, and cutting-edge technologies that combine smart materials, embedded sensing, and AI-based control mechanisms. He highlighted how robotics is evolving from rigid structures to flexible, adaptive systems capable of operating in complex real-world environments.

The talk also focused on research opportunities and applications of soft robotics in healthcare, industrial automation, environmental monitoring, and disaster relief operations. Prof. Hasan shared insights into interdisciplinary research where mechanical design, computer intelligence, and material sciences converge to shape the future of robotics.

An interactive Q&A session further enriched the learning experience. Students actively engaged with the facilitator, raising queries on career prospects, global research opportunities, and India’s role in advancing robotics. Prof. Hasan’s detailed responses motivated students to consider robotics and AI as thriving domains for higher education and professional growth.

The program also included hands-on interaction and engaging discussions, giving students a glimpse into the practical aspects of robotics research. The dynamic nature of the session kept participants highly involved and inspired them to explore projects in this cutting-edge area.

The event was efficiently coordinated by Prof. (Dr.) Mehfuza Holia and Prof. (Dr.) Ashish M. Thakkar, with the enthusiastic support of the student team: Utsav Maradia, Ruchit Soni, Smit Talaviya, Kishan Mori, and Rushik Javiya.

The TRS Student Chapter and organizing team expressed their sincere gratitude to Prof. (Dr.) Vinay Patel for his constant guidance and mentorship. Special thanks were also extended to CVM Chairman Er. Bhikhubhai Patel and the BVM-CVM Management for their unwavering support in fostering innovative academic initiatives that provide students with exposure to global technological advancements.

The session was highly appreciated by attendees for its clarity, practical insights, and future-oriented perspective. Many students expressed a renewed motivation to engage in robotics, AI, and interdisciplinary research, marking the event as a memorable and knowledge-enriching experience.

It was a proud moment to appreciate the sincere efforts and achievements of our student by awarding a certificate of excellence. The encouragement given by our respected faculty members, Mr. Mohsin Hasan and Ms. Mehfuza Holia, added great value to the occasion. Such recognition not only celebrates the hard work of the student but also motivates them to move forward with greater confidence and determination. Moments like these inspire all students to believe in their potential, set higher goals, and continue striving for success.
